CS 61 Problem Set 5

Fill out both this file and AUTHORS.md before submitting. We grade anonymously, so put all personally identifying information, including collaborators, in AUTHORS.md.

Grading notes (if any)

Extra credit attempted (if any)

Variable Substitution

- Support for variable declaration (e.g., ANIMAL=COW) and substitution ($ANIMAL would become COW).
- Support for parentheses (e.g., ${ANIMAL}s outputs COWs).
- Wrote 5 test cases: VAR1 to VAR5.

Interrupts

- Support for interruptions.

Additional Extra Credit for this Commit:

Complex Redirections

- Added support for >> and 2>>.
- Wrote 2 test cases: REDIR19 for >> and REDIR20 for 2>>.
